

Growth in U.S. National Debt vs. Cumulative Trade Deficit, 1976-2010

Notes:

1. 2010 trade data annualized, based on actual data through September.
2. Cumulative trade deficit expressed in current dollars.
3. Sources: U.S. Treasury (national debt); Bureau of Economic Analysis (trade deficit)
4. U.S. National debt was \$0.53 trillion in 1975. Chart above shows growth in the debt from that point, not actual debt. (Add \$0.53 trillion to obtain actual debt.)
